Projet : Comparateur de Paniers Supermarchés
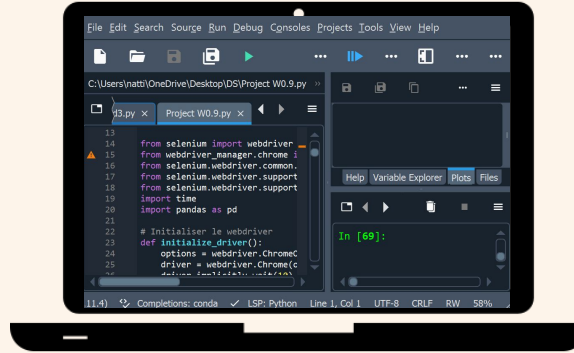

BATINA-AGASA Fervent
PROMWANG Nattirat

How it works:

**Your shopping list**

Selenium
- **Automate and scraping articles' prices from both supermarkets**
- **Choose Mode auto or manual mode**

Make comparison of one article or your whole basket
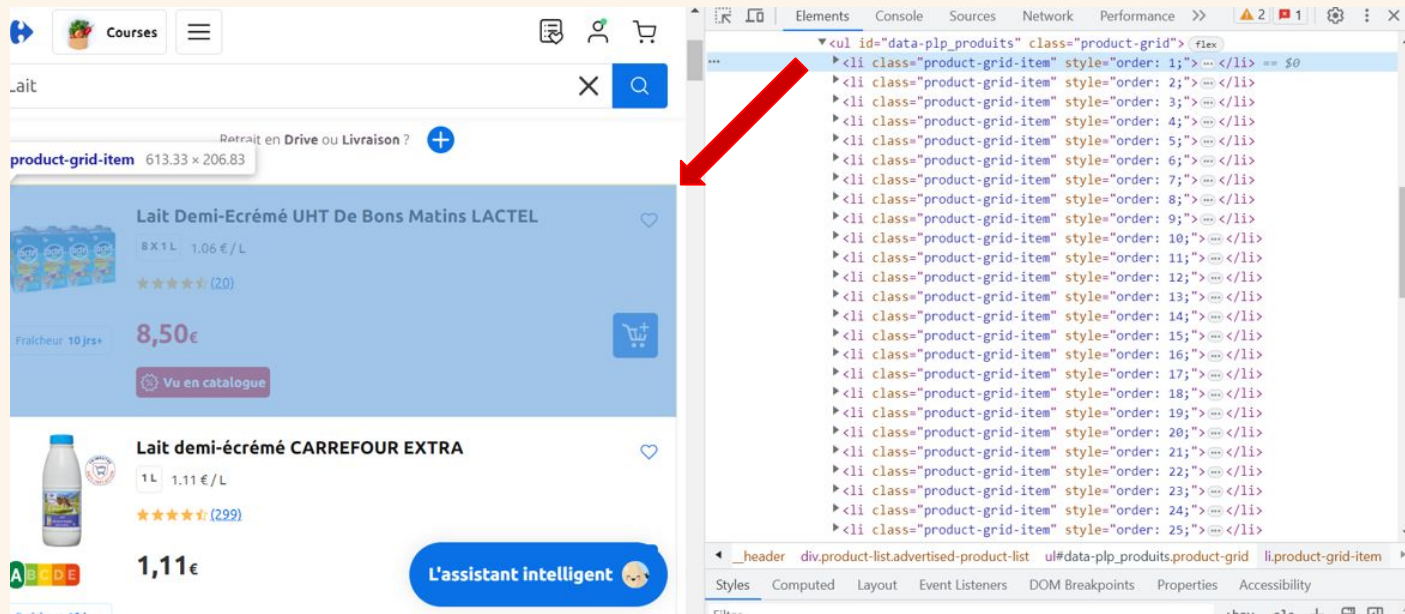

**Let you know which Supermarket is cheaper**

Issues

1. **CAPTCHA**

Issues

2. Website Construction

Issues

2. Website Construction (continue)

Issues

3. Interface et le temps d'attente

Tkinter, PyQt or PySide

Comparaison de Prix Auchan et Carrefour

Entrez votre liste de courses séparée par des virgules:

Mode de sélection:

○ Manuel
○ Auto

Comparer les prix
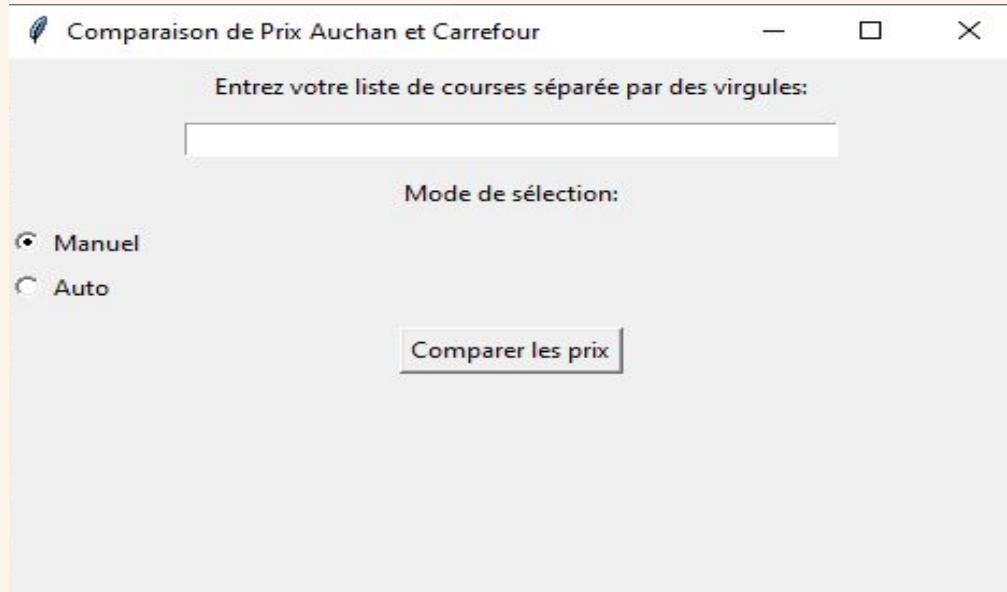

Conclusion

1. **What we have learned from the project**
   - Improved our skills on Python
   - Better understanding of HTML and site composition
   - Teamwork and communication skills

2. **Future Improvement**
   - Create an interface
   - Add more supermarkets (those without CAPTCHA)
   - Store data from last search to compare the price of new search

Demonstration

1. Manual Mode
2. Automatic Mode

Merci

Auchan

Carrefour
